Subject: RE: Availability for TSCA SACC Meeting - Perchlorate - week May 26th 2020

Importance: High

Greetings!

In the next day or so, you'll be getting an e-mail from Tamue Gibson, my colleague, who will be taking over the DFO responsibilities for me regarding the review of the draft risk evaluation for perchloroethylene.

The meeting dates are scheduled for May 26-29, 2020. Please confirm your availability with Tamue.

As you just recently completed your 3110-48 (Confidential Financial Disclosure Form) in late February, you will not have to complete another one. As we are working virtually, Please confirm the date when you signed your 3110-48 and sent it to me – I believe it was 2/20/2020.

Thank you for your interest in participating as an ad hoc member of the TSCA SACC.

Best regards,
Sharlene

Subject: RE: Availability for TSCA SACC Meeting - Perchlorate (likely 2 day meeting week of April 27-May 1, 2020)

Sharlene,
I am available for the Spring April 27-May 1 meeting. I am particularly interested in the perchlorate review since I have expertise in thyroid toxicology and endocrine pathology.
I am interested in the perchloroethylene review, but I am not sure when that will be scheduled.
Thank you,
Thomas Rosol

[Blind copied. Prevent responding to all --- thank you!]

Greetings!

EPA has one more TSCA SACC meeting scheduled for this Spring, April 27-May 1, 2020. The last two draft risk evaluations to be reviewed are for perchlorate and asbestos.

Most of you have been selected for trichloroethylene TSCA SACC panel; meeting to be held March 24-26, 2020. Some of you were not available.

I will be the Designated Federal Official for the perchlorate meeting in addition to performing the ethics reviews as the Assistant to the Deputy Ethics Official.

The original plan was for both trichloroethylene and perchloroethylene to be discussed during the same week. Unfortunately, both draft risk evaluations are not available for public review at the same time.

I think that the expertise needed will be virtually identical to that needed for the trichloroethylene panel. This is why I am asking if you are interested and available to participate in the scientific review of the draft risk evaluation of perchloroethylene

Please provide a response as soon as possible.

Thank you.

Best regards,
Sharlene
